

SUMMERSCHOOL + EXKURSION

ASSIUT . EGYPT

October 1-10th, 2017

RAPIDLY GROWING INFORMAL SETTLEMENTS AND INTERACTIVE INFRASTRUCTURES

Overview

Assiut is one of the fastest growing cities in Egypt with strong informal development on the fertile banks of the river Nile. Dense new settlements quickly move into the agricultural land with supply and disposal infrastructure not catching up the progress.

In the creative design lab we develop concepts and designs for interactive infrastructures that link energy, water, food and waste flows and facilities addressing these challenges through a metabolic approach.

The summer school is organized within the framework of the BMBF funded research project "Rapid Planning".

Participants

In the course of the creative lab, 25 students from the disciplines of landscape architecture, urban design, architecture, urban and regional planning and similar disciplines are welcome.

Requirements

An application for the participation is required.

Please hand in a motivation letter, CV, a selected portfolio and a statement on your level of English to: juliane.brandt@tu-berlin.de

Costs

Approved funding by DAAD program 'promos' of 400€ per participant. Costs for logistics and food are covered by the RP project. Flight costs and accommodation have to be covered by the participants.

Estimated own contribution:
100-150€

Coordination

Technische Universität Berlin -
Chair of Landscape Architecture
and Open Space Planning

Cooperation partner

Technische Universität Berlin -
Chair of Urban Development,
Campus El Gouna

Frankfurt University of Applied
Sciences - Faculty 1: Architecture,
Civil Engineering, Geomatics

Assiut University - Dep. of
Architectural Engineering, Faculty
of Engineering

City of Assiut (Governorate) -
Urban Planning Dep. Assiut
