THE CARTOGRAPHIC PARADOX- BILL RANKIN'S RADICAL CARTOGRAPHY
Map of the historical meanders of the Mississippi river (detail), by Harold Fisk, 1944

lecture series t&p summer 18

How do interdisciplinary theory and practice meet in urban design? Several approaches of planning and designing for people respectively with people will be introduced and juxtaposed by researchers and professionals out of the academic and professional world of landscape architecture and urban planning.
